# BEARTH: SEASON ONE

Episode 1: The opening episode begins with Deepwater Horizon destroyed by a pair of giant tsunamis that rip the rig apart. This cataclysm is only the beginning as planet Earth begins coming apart as predicted by Dr. Loretta Wesson. President Riker wins his election with a campaign run entirely on social media. He becomes the world leader of the grand division. Richard Daring escapes Pasadena in one of the greatest car chases and saves the President's team during an amazing jet aircraft escape.

Episodes 2-10: The evil Syndicate plots to kill the team, including the President multiple times. True history of how the Syndicate came to power are recounted in epic stories that enlighten the audience. The six teams are each developed during the scenes so that the audience keeps up with how they affect one another. Boris plans his revenge against the Jihadis, but is unwittingly being used by the Syndicate to plunge the world into global war. Earth cataclysms punctuate the episodes with quakes and stunning high-altitude lightning.

Episodes 11-14: The Syndicate leadership is uncovered as a member of the ancient Nephilim—also know as the fallen angels. The history of how these supernatural angel-class beings plan to capture the human race is revealed. General Morlay fulfills his calling as the supreme human leader over the Syndicate's forces dedicated to plunging the planet into war. The corruption is explained clearly enough to change the paradigm of the relationship between man and the principalities focused on the destiny of Earth. The special effects throughout the Series are compelling.
